PREPAID CALLING CARD TELEPHONE

The consumer-friendly public calling card telephone.
The IP-410U is a Public Calling Card Telephone.
The IP-410U is semi-outdoor and is specially built in metal housing, with armoured handset, metal spiral cord and hook switch, to prevent vandalism.
The advantage of the IP-410U is that it allows the user to place a call either using a regular calling card or the enormously time-saving and cost-saving Magnetic Card. Once the magnetic card is swiped through the slot its validity is very quickly checked and the user needs to dial only the country code plus destination number. No access number or pin code number need to be dialed at all. This greatly reduces the number of uncompleted calls and leads to considerable cost and time savings both for the provider and for the user. Instead of dialing nearly 40 digits the user dials only about 10 digits to reach his or her destination and this easy dialing process encourages users to place many more calls with the magnetic card.

The owner of the phone can enable or disable dialing of toll-free numbers from this phone according to his wish. There are also fast-dialing knobs for emergency numbers.

FEATURES:

DTMF dialing
Programmable through the keypad
Access to toll-free numbers which can be disabled
Metal housing, anti-vandalism, semi-outdoor
Weight approximately 7 kg.
Wall-mounted
16 knobs on keyboard
Armoured handset
